

DRAFT Plant List
Wildflower Walk with Bill Dunmire
East Placitas Open Space
May 15, 2010

Here's a list of plants (grass list at end) observed in 2010, compiled in consultation with Bill Dunmire.

The list has entries that are not included in the photographic record of the walk presented in the slide shows.

NB: Plant names are alphabetized, so 'Feather Indigobush' appears as an "F", not as an "I". This can be awkward if you look for 'Scarlet Gaura' under "G".
